Sunflower Series 10 Years in the Making

The Sunflower Series is a near and dear piece of writing. I have been working on this set of books for over 10 years. Back in 2014, I had some really difficult times in my career. I wasn't sure where the Lord was leading or what I was meant to do. I had been deeply hurt in my previous employment and was searching for meaning in all that I was. At times it felt like I was losing hope.

I walked Violet, the sunflower. Well first, I started writing feelings down, that slowly turned into writing "Becoming A Sunflower". While this was the first book I wrote, it's not the first one in the series.

Violet gave me a voice to tell my story in a fun and whimsical way that I feel can reach many children and families alike that may find it difficult to talk about certain hard topics. Violet's journey starts out as a seed and we follow her to her growth as a sunflower.

Often times we feel like we don't know where God is leading. I sure felt that way. Sometimes the answers come right away and sometimes they come 10 years later. Don't lose faith for it is a gift.

“Faith is confidence in what we hope for and assurance about what we don't see.”
